# ABIS EU-FUNDED PROJECTS

- **Exploring Plausible Circular Futures - ExPliCit (2023-2025)**

- While there is common agreement that the transition towards a Circular Economy (CE) could foster more sustainable futures, there is a lack of discussion about how a viable, feasible, and desirable CE system should be organised. Most of the current literature fails to recognise this, presenting the CE transition as a straightforward, neutral, and apolitical process, implicitly characterised by a techno-optimistic and eco-modernist stance. Most CE work is conducted at practical and technical levels, looking at material and energy flows. The basic assumptions concerning societal structures, along with underlying worldviews which should be embedded in a CE are largely overlooked or unclear. The project aims to bridge this gap through theoretical and practical research happening through academia-industry staff exchanges involving 5 academic and 5 non-academic partners.

- Funding received: EUR 350,000
- Consortium partners: *Università degli Studi di Napoli Parthenope (coordinator), University of Vigo, Università Degli Studi di Catania, University of Sevilla, ABIS, University of Sheffield, FAEL - Federación Andaluza de Electrodomésticos y Otros Equipamientos del Hogar, CNA Campania Nord, Federconsumatori, Revertia.*

- **Sustainable Careers for Researcher Empowerment (2023-2025)**

- Aiming to improve research careers and reduce career precarity, the project developed coordination and support measures to establish, test and implement a common Research Career Framework (RCF), which offered a structured and supportive skills and development model for researcher recruitment, employment, training, career progression and mobility. The RCF aimed to ensure career development and progression structure, recognise research and transferable skills and competencies, facilitate intersectoral collaboration and mobility, and deliver solutions against precariousness of research careers in academia.

- Funding received: EUR 1 320 000
- Consortium partners: *PLOCAN - Oceanic Platform of the Canary Islands (coordinator), ABIS, CRAC - VITAE - Careers Research & Advisory Centre, Technopolis Group, ICoRSA - International Consortium of Research Staff Associations, EURODOC - European Council of Doctoral Candidates and Junior Researchers, MCAA - Marie Curie Alumni Association, Adoc Talent Management, YERUN - Young European Research Universities Network, University of Rijeka, University of Cyprus, Nova University Lisbon, UEFISCDI - Executive Agency for Higher Education, Research, Development and Innovation Funding, Austrian Institute of Economic Research, CPN - Center for the Promotion of Science, WIFO, VDI/VDE Innovation.*

## • **Open Universal Science – OPUS (2023-2025)**

- The OPUS project developed coordination and support measures to reform the assessment of research and researchers at Research Performing Organisations and Research Funding Organisations towards a system that incentivises and rewards researchers to take up Open Science practices. With a specific focus on reforming the research(ers) assessment system, the consortium conducted a comprehensive state of the art on literature and initiatives for open science, designed a set of interventions, developed and tested indicators and metrics to monitor and drive open science, and utilised stakeholder-driven feedback to refine and validate actions. The outcomes of the project were also synthesized into policy briefs.

## • **Realising the Transition to the Circular Economy (2018-2023)**

- ReTraCE was a research project under the Marie Skłodowska-Curie Innovative Training Networks funding scheme, that provided multidisciplinary training to 15 early-stage researchers (ESRs) on the transition towards a more sustainable mode of production and consumption in Europe. The researchers facilitated the implementation of the Circular Economy Strategy of the European Commission. The project provided policy insights and enhanced the understanding of the applicability of the CE paradigm from economic, environmental and social aspects.

## • Innovation for Sustainability (2013-2017)

- The I4S project was a research initiative that provided training and funding for researchers to investigate sustainability-driven innovation in business. One of the main outcomes of this project were various policy briefs that helped academics, practitioners and policy makers to foster sustainable innovation in doctoral training as well as the creation of new business models and to help implement measures that integrate sustainability at all education levels.

- Members involved: *ABIS, Central European University, Copenhagen Business School, INSEAD, IESE, Kozminski University, Politecnico di Milano, Tilburg University, University of Nottingham, WU Wien, Vlerick Business School.*

- **Business Case for Diversity (2007-2008)**

- The aim of the project was to place diversity management firmly on the strategic business agenda and activities of European companies of all sizes by encouraging the exchange of good practices and promoting the development of diversity policies and activities by businesses, employers and business schools
- Website: <http://www.iegd.org/pdf/Task%201-%20EBTP.pdf>
- Funding received: EUR 1,000,000
- Members involved: *ABIS, CSR Europe, EFMD.*

- **CSR Platform (2004-2007)**

- As project leader for CSR Platform, we helped to build the foundations for a European Research Area in the field and a European and Global reference point for the advancement and dissemination of knowledge on CSR by strengthening and expanding collaboration between academics between disciplines, between types of research (fundamental and applied research), between generations, and between the academic community at large and the business and other stakeholder communities.
- Website: [http://cordis.europa.eu/project/rcn/93062\\_en.html](http://cordis.europa.eu/project/rcn/93062_en.html)

- Members involved: *ABIS, INSEAD, Copenhagen Business School, Kozminski University, SDA Bocconi School of Management, Kozminski University.*

# ABIS PROJECTS AND OPINION LEADERSHIP INITIATIVES

- **Futures of Business Education in 2055 (2022-2024)**
  - In May 2022, ABIS launched a scenario building project to understand how the system of business education could change over the next 30 years. Aligned with its mission, the aim was to offer original, novel insights and solutions to foster pedagogical innovation and dialogue around management theory as well as institutional transformation in business education. Four alternative scenarios were built upon extensive research and stakeholder intelligence. The scenarios vary considerably and provide starting points for reflection and the development of responsive and adaptive strategies and policies. A final report was published in 2024 and is available at <https://zenodo.org/records/11477656>
  
- **Mentoring Programme for Early-Stage Researchers (2021-2024)**
  - The programme aimed to strengthen the learning and development of Early-Stage Researchers (ESRs) and to create supportive connections that are necessary to contribute to address current environmental and social challenges. The core of the programme, that ran each year from October to June, were one-to-one mentoring sessions for ESRs with experienced academics and business professionals in sustainability helping ESRs progress in their careers and make an impact on society. Regular workshops and meetings organized by ABIS were included. 24 mentor-mentee couples took part in the programme over the years. For more information, please refer to: [www.abis-global.org/blog/mentoring-programme-for-early-stage-researchers](http://www.abis-global.org/blog/mentoring-programme-for-early-stage-researchers)
  
- **ABIS Sustainability Assessment (2020- 2024)**
  - ABIS designed and developed Sustainability Assessment is a management model to integrate sustainability in higher education institutions (HEIs), with the purpose to report to their decisionmakers:
    - The actual status of sustainability implementation at institutional and academic level
    - How to effectively enable sustainability initiatives
    - The impact of sustainability actions on the institution's stakeholders
    - Suggestions for priorities in developing sustainability strategies
  - ABIS members such as Nottingham Trent Business School and ESMT Berlin have undergone full assessment, with insights integrated into their sustainability strategy. For more information: [www.abis-global.org/blog/abis-sustainability-assessment](http://www.abis-global.org/blog/abis-sustainability-assessment)

- **Sustainable Investing Summer Course (2020-2022)**
  - ABIS co-organized three editions of the NN Investment Partners' Sustainable Investing Summer Course. First created in response to the COVID-19 pandemic, this opinion leadership initiative targeted the finance and asset management communities. 22 leading academics from the ABIS network and beyond shared their knowledge in lectures on key sustainability trends impacting the decisions of governments, companies as well as asset owners and investors. The initiative qualified for continuing education credits by the CFA Institute. More information can be found at: [www.abis-global.org/blog/nn-investment-partners-sustainable-investing-summer-course-on-tour-2022-edition](http://www.abis-global.org/blog/nn-investment-partners-sustainable-investing-summer-course-on-tour-2022-edition)
  
- **Scenario Exploration System (2017 – 2024)**
  - The Scenario Exploration System (SES) is a serious gaming tool developed to facilitate the application of foresight in practice and designed to help participants, in less than 3 hours, to engage in systemic thinking with a long-term perspective and to explore alternative futures on specific issues. Over 7 years, ABIS pioneered the use of the SES in responsible management education and made significant contributions to its development. ABIS organized and facilitated over 30 SES workshops for HEIs, public organizations and NGOs across 12 countries. Over 600 participants, including university students, academic faculty members, policymakers, business and civil society representatives attended our workshops. Most recently, to meet increasing demand and geographic accessibility, ABIS developed SES facilitation trainings and trained 70 independent facilitators. More information is available at:
    - [www.abis-global.org/blog/scenario-exploration-system-workshops](http://www.abis-global.org/blog/scenario-exploration-system-workshops)
    - <https://zenodo.org/records/14724399>
  
- **Building Leaders for Long-Term Business Performance (2017)**
  - The project was an ambitious inquiry developed in 2017 by the University of Cambridge Institute for Sustainability Leadership (CISL) in partnership with ABIS. It aimed to deepen the understanding of how multinational companies defined and developed their leadership and talent pipelines in order to thrive in an increasingly complex business environment, while simultaneously contributing to long-term social, environmental and economic goals. The project's research finding and outcomes were published in a final report available at: <https://zenodo.org/records/14718216>
  
- **The Future Board – An ABIS-Mazars Initiative (2016-2017)**
  - In autumn 2016, ABIS and Mazars organised two high-level roundtables to explore the stewardship role to be played by Boards of Directors in creating long-term, sustainable corporate success. These considered the macro trends and challenges that businesses are facing from different strategic, governance and leadership perspectives, as well as the innovation prospects for business schools in terms of research, executive development programmes, post-graduate curricula and wider corporate engagement. Website: [www.abis-global.org/projects/the-future-board-an-abis-mazars-initiative](http://www.abis-global.org/projects/the-future-board-an-abis-mazars-initiative)

- **Global Talent Development Forum (2015-2016)**

- ABIS convened three high level dialogues convened by ABIS between December 2015 and October 2016, with invaluable support from founding partners Unilever and IBM. Through in-depth critical debate and reflection with senior HR, Leadership and Talent executives, we have sought to better understand the challenges facing business in trying to anticipate the various skills, qualities, mindsets and values that they believe will underpin both a sustainable, profitable business model and a long-term license to operate in an unprecedented VUCA world. For more information, please refer to: <https://www.abis-global.org/projects/abis-global-talent-forum>

- **The European Pact for Youth (2016-2017)**

- The Pact for Youth was a mutual engagement of business and European Union leaders. Initiated by CSR Europe, it brings together representatives for business, education and youth, and the European institutions. More information is available at: <http://www.csreurope.org/pactforyouth>

- **ABIS Education Initiative (2016)**

- In 2016, ABIS launched a Global Education Initiative to support the realization of its mission. The overall objective was to map and estimate members' Sustainable, Responsible and Ethical SRE educational offer. The findings were published in the resulting report, which is available under the ABIS Publications section.

- **Health as an Asset (2010 – 2016)**

- The Health as an Asset project, which was led by Rutgers University and the Johnson & Johnson Corporate Citizenship Trust contributed greatly to the third SDG. It created an international platform for experts drawing their expertise, passion and commitment from across the global spectrum - corporate, academic, donors, public policy and others - and all regions of the world, to meet in different “thinking spaces”, under Chatham House rules, for a “voyage of discovery” which helped identify decision making concepts, models and processes that lead to better health outcomes for all.

- **Managing the Responsible Business Challenge in Africa: an IBM-ABIS Strategic Programme (2014 – 2019)**

- A corporate-academic partnership programme, where ABIS partnered with various business schools in Africa to facilitate - together with the help of Unilever, GSK and IBM - greater collaboration between Africa' higher education institutions and business to address sustainability challenges. Please find more information at: <https://www.abis-global.org/projects/responsible-business-challenge-africa>

- **United Nations Global Compact LEAD Initiative (2011 – 2013)**
  - To challenge and support leading companies in reaching higher levels of corporate sustainability performance, Global Compact LEAD was launched in January 2011 as a leadership platform within the Global Compact.
- **Transforming Business-Government Relations For Competitiveness & Growth (2011-2012)**
  - In 2011, ABIS launched a qualitative, interview-based research with EPPA to examine how corporate leaders and senior policy figures perceive the influence of their interrelations on strategic decision-making. A select group of multinational companies across multiple sectors and EU institutions were engaged through interviews to explore how executives receive and internalize political signals, especially from the EU, and align regulatory risk / opportunity with business strategy and planning.
- **Practical Wisdom for Sustainable Management (2009-2014)**
  - This project aimed at overcoming the often-decried normative void in management education. As an outcome of this project, new approaches towards spiritual traditions were promoted, awareness was raised nationally and internationally, blog and press resonance, several MA theses and PhD projects realized and projected. Additionally, several special issues were launched addressing the various themes covered by the project.
- **Sustainable Value (2007-2009)**
  - *Sustainable Value: Corporate Responsibility, Market Valuation and Measuring the Financial and Non-Financial Performance of the Firm* was a two-year EABIS funded research project. Its purpose was to explore how the environmental, social and governance performance of companies might impact on the drivers of business success; how companies explain these linkages to investors, and how the investment community treats these data.
- **Managing Stakeholder Media (2007-2010)**
  - This project mapped and quantified the dynamics of “stakeholder” information media and their impacts on business, at a moment when these media platforms are supplanting news media as key vectors of opinion and action. The goal was to validate hypotheses of predictive value for business communication in CSR initiatives.
- **Principles for Responsible Management Education (2007-ongoing)**
  - As a co-creator of PRME and as a member of its Steering Committee, ABIS was part of the group of global and regional associations which advised the PRME Secretariat on a wide range of strategic and operational issues. Find more information at: <http://www.unprme.org/>.

## BOOKS

- Lenssen, G.G. & Smith, N. C. (Eds.), 2019, *Managing Sustainable Business - An Executive Education Case and Textbook*, Springer
  - This book provides a framework for managers to pursue sustainable business in a strategic way. At the same time, it is a learning model, starting with foundation risk management and stakeholder management and moving on to the more complex challenges of strategic differentiation and business model innovation.
  
- Lenssen, G.G., Rhee, J.H. & Martinez. F., 2016, *The Role of Corporate Sustainability in Asian Development*, Springer
  - Examines the antecedents, processes/operations and outcomes of corporate responsiveness to environmental and social issues in the context of Asia
  
- Smith, N. C. & Lenssen, G.G. (Eds.), 2010, *Mainstreaming Corporate Responsibility*, Wiley
  - The book pioneers a way for business schools to equip future business leaders and managers with the knowledge, skills and competencies to meet the current business challenges. Based upon a major curriculum development project run by the INSEAD Social Innovation Centre, London Business School and EABIS, this book is a collection of texts and cases for use in both core and specialized courses across business disciplines, including strategy, accounting, entrepreneurship, marketing, operations, and finance.
  
- Sachs, S., Rühli, E., & Kern, I., 2009. *Sustainable Success with Stakeholders: The Untapped Potential*. London: Palgrave Macmillan
  - This book shows managers how they can identify their stakeholders and cooperate with them in a mutually successful and satisfying way. It includes numerous examples from the case studies and from international firms, illustrating the stepping stones to a comprehensive stakeholder management.
  
- Ionescu-Somers, A. & Steger, U., 2009, *Business Logic for Sustainability: A Food and Beverage Industry Perspective*, Palgrave Macmillan
  - The food and beverage industry is vital to the global economy, but in a society increasingly concerned with sustainable development, it is facing new challenges. This book presents the results of a research project focused on the management challenges that sustainable development presents to presents to food and beverage companies.
  
- Pinkse J. & Kolk, A., 2008, *International Business and Global Climate Change*, London: Routledge
  - This book provides a comprehensive analysis of international business responses to global climate change and climate change policy. Gives a concise treatment of developments in policy and business activity on global, regional and national levels, using examples and systematic data from a large number of international companies.

- Steger, U., Ionescu-Somers, A., Salzmann, O. & Mansourian, S., 2008, *Sustainability Partnerships. The Manager's Handbook*, Palgrave Macmillan
  - Social and environmental issues can be very complex and overwhelming for managers. A partnership seems like an obvious solution. But what type of partnership is appropriate, what are the pitfalls and how can they be overcome? The authors use the experiences of a number of experts in companies, NGOs and governmental bodies to find the answers.
  
- Kakabadse A., & Morsing, M. (Eds.), 2006, *Corporate Social Responsibility: Reconciling Aspiration with Application*, Palgrave Macmillan;
  - The book examines the challenges of regulating and reporting CSR application, exploring issues concerning all agencies involved. Recommendations for performance enhancement are complimented by insightful enterprise and case studies on CSR sustainability.
  
- Steger, U. (Ed.), 2006, *Inside the Mind of the Stakeholder: The Hype Behind Stakeholder Pressure*, Palgrave Macmillan
  - Evidence obtained from stakeholder groups in Europe is sobering indeed in the context of globalization and the constant striving for competitiveness. This book provides an honest and in-depth analysis of how stakeholders themselves assess and influence corporate sustainability.
  
- Kakabadse A., & Kakabadse N. (Eds.), 2006, *CSR in Practice: Delving Deep*, Palgrave Macmillan
  - This book delves deep into the application of corporate social responsibility, surfacing an uncomfortable reality. Honest intent without managerial skill results in CSR paucity. Studying insider trading, private healthcare and investment banking provision, it reflects an absence of ethical leadership, undermining corporate reputation.
  
- Steger, U. (Ed.), 2004, *The Business of Sustainability: Building industry cases for corporate sustainability*, Palgrave Macmillan
  - This book goes further than ever before in trying to be more specific about the economic rationale for corporate sustainability, by approaching this issue on an industry-specific level. To do this, empirical evidence was gathered from managers in nine industries, along with their stakeholders, during an extensive and ambitious research project.
